AIR FORCE QUALIFICATION TRAINING PACKAGE (AFQTP) — UNDERGROUND ELECTRICAL DISTRIBUTION

SYNOPSIS:

We have recently completed a new AFQTP CD-ROM – *Underground Electrical Distribution*. This computer-based software program has been distributed to all civil engineer Unit Education & Training Managers to meet upgrade training requirements in support of the AFQTP program. This program presents standardized guidance for specific tasks identified in the

Electrical Systems Career Field Education and Training Plan.

This program is the first of its kind to address both the 5- and 7-skill level requirements in one CD-ROM. All nine CORE tasks found in the Underground Distribution Systems module are discussed here.

The first seven lessons pertain to the 5-level user, while Lesson 8 covers the one 7-level requirement found in

this module. All eight lessons are stand-alone and have the flexibility to be taken in any order. This product replaces the paper-based Underground Distribution Systems QTP, as well as the two Williams Learning Network videos entitled *Direct Burial Cable* and *Splice HV Underground Cable Using Tape*.

This QTP provides valuable information for the new technician and is an excellent refresher for the more experienced technician/supervisor. Review questions are included at the end of each segment or lesson.

ACCESSIBILITY:

Initial distribution has been made. Information regarding distribution procedures or ordering copies of this and other CD-ROM and/or video products may be requested through HQ AFCESA/CEOF. Point of contact is Mr. Ralph Gruber, DSN 523-6181, or commercial (850) 283-6181, e-mail ralph.gruber@tyndall.af.mil.
